SpooliT® Enterprise
Intelligence in document management

# SpooliT Enterprise Product Information

SpooliT Enterprise is designed to enable companies to download, archive, and reformat spool files into common PC formats, then distribute iSeries and AS/400 reports automatically. This produces a new range of business options that both reduce workflow demands and create new ways to serve customers

Discover capabilities you never thought possible without intense administration! With SpooliT you can easily identify mission critical data, save these definitions as templates, and most importantly reuse these to directly feed PC applications such as Excel.
At the heart of SpooliT resides an intuitive rules based engine with the versatility to create archiving rules, categorization rules, distribution rules, data mining and extraction rules.   Dynamically monitor any number of iSeries 400 output queues, this enhances transparency and create SpooliT schedules to automate jobs.

SpooliT Enterprise edition offers an unlimited site licence, for each iSeries or AS400. Install any combination of SpooliT products for any number of users.

Automatically File, Format & Output Spools Files to:

→ Internet Explorer	→ Excel	→ Word
→ PDF Adobe	→ Printer	→ Email
→ Fax	→ Archive	→ +Much More

End User Friendly Intuitive Interface
